Kellermeyer Manufacturer's Supporting **Green** & Sustainable Solutions

Cleaning Chemicals

(LEED EB Indoor Environmental Quality Credit 3.4-3.6 Sustainable Cleaning Products & Materials AND LEED EB Materials & Resources Credits 4.1-4.3 Sustainable Cleaning Products & Materials)

Featuring a full line of custodial cleaning chemicals that are approved by GS-37 and/or meet stringent environmental standards.

Healthy High Performance Cleaning-Developed by JohnsonDiversey

Healthy High Performance Cleaning (HHPC) is a program that provides the pathway and best practices to clean and maintain sustainable buildings. It goes beyond traditional cleaning for appearance sake only. It provides sound strategy, practices and guidelines to clean for health, safety and the environment.

HHPC includes widely accepted environmentally preferable purchasing guidelines to help you formalize your requests for chemicals, janitorial paper and liners, tools and equipment.

HHPC can be both simplistic or comprehensive in scope; it depends on your goals and objectives. For those seeking a simple program to help reduce the health and environmental impacts of their facilities on building occupants and cleaning staff, HHPC provides easy to understand processes, procedures and training. For those working toward LEED-EB Certification, many additional components of HHPC can help you earn as many as 14 points or more than 40 percent of the minimum number of points required. www.jwp.com

Tools & Equipment

LEED EB Indoor Environmental Quality Credit 3.7 Sustainable Cleaning Equipment & LEED EB Indoor Environmental Quality Credits 10.6 **Green** Cleaning Low Environmental Impact Cleaning Equipment Policy

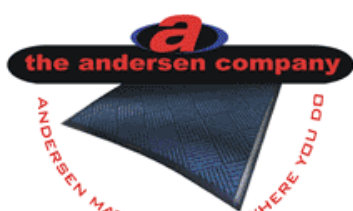

Vacuums with **Green** Label Certification by the Carpet and Rug Institute for soil removal, dust containment, ergonomic design and noise reduction while still achieving superior results. www.pro-team.com

Product **Green Features**

- 100% of raw component shipping materials are reused.
- 100% of NSS batteries are recycled and recyclable.
- 100% of steel used in product frames is recyclable.
- NSS filter bags contain 90% recycled paper.
- NSS offers high-efficiency HEPA filters.
- NSS equipment features adjustable water flow for conservation.

Entryway Matting Systems

LEED EB Indoor Environmental Quality Credits 10.1 **Green** Cleaning Entryway Systems

LEED EB Indoor Environmental Quality Credit 3.8 Entryway Systems

While all Anderson mats can achieve points for LEED-EB, The NEW Waterhog™ Eco Line is made from 100% recycled PET post-consumer recycled fiber reclaimed from drink bottles and 15% post-consumer recycled tires. www.andersonco.com
