

Proper Mat Care

To help you get the best possible use of your mat and to maintain its appearance and usefulness over the longest possible time:

A. VACUUM DAILY

B. SPOT REMOVAL OF STAINS

- Hand wash the stain using a water based household carpet detergent or shampoo.

C. DEEP CLEAN PERIODICALLY

- Depending on traffic and soil conditions, the mat should be cleaned using an extraction cleaner system (such as a Rinse-N-Vac® or Rug Doctor®). Use a water based carpet detergent. Follow the manufacturer's directions for using the extraction cleaner and the detergent.

D. DRYING

- This mat will dry quickly if all excess water is removed. Squeegee, use a "wet/dry" vacuum or hang the mat to remove excess water.

E. IMAGE/LOGO CLEANING

- If your product contains a flocked design or vinyl insert, the mat can be cleaned with most any water based liquid or foam cleaner using a hand held scrub brush to remove surface soil. DO NOT use solvent-based cleaners, rotary scrubbers, or other mechanical devices to clean IMAGE MATS. Use of solvent based cleaners or rotary scrubbers will void the mat warranty.

F. STORAGE AND HANDLING

- Roll dry carpet in compact roll with pile facing out. Lay flat. DO NOT STAND ON END. Do not crush. Store in cool dry area.

G. MATS WITH MAT-LOCK™ OR RUG-HUGGER™ BACKING

- Mats with Mat-Lock™ or Rug-Hugger™ backing should NOT be dragged. Dragging these mats across the floor may damage the backing. To move these mats, it is best to roll them up and then pick up the entire roll.

CAUTION: IF THE BORDERS ON MATS OR MATTING BECOME BROKEN OR CURLED, THE MAT OR MATTING SHOULD BE REMOVED FROM SERVICE UNTIL THE TRIPPING HAZARD CAN BE CORRECTED.

A. TORN OR RIPPED BORDERS

- If the vinyl border of the mat is ripped or torn, the damage can usually be repaired by gluing the damaged section together with a cyanoacrylate ester type (Super Glue) adhesive.

B. CURLED BORDERS OR CORNERS

- Curled borders or corners can usually be flattened. Warm the vinyl in the curled area with a hair dryer until the vinyl relaxes and lays flat. Do not use a heat gun - excessive heat may damage the vinyl.

Anytime you need assistance with cleaning, maintaining or deciding the best matting program for your facility just give us a call at 800-445-7415 and we will have your account representative contact you right away.

Choosing Kellermeyer as your Cleaning Team Partner will help reduce your cleaning and packaging supply costs, protect the health and safety of you staff and make your job easier and much more rewarding.
